1: Identification of the Material and Supplier

Product Identifier
Gel Whiz

Other Means of Identification
None allocated

Recommended Use
For the removal of bore stains from hard surfaces

Supplier

Emergency Phone Number
Poisons Information Centre (Australia) 13 11 26

2: Hazard Identification

Classified as hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) criteria of Safe Work Australia and classified as a non-dangerous good according to Australian Dangerous Goods Code.

GHS Classification
Acute Toxicity category 4

Signal Word
Warning

Hazardous Statement(s)
Harmful in contact with skin. Harmful if swallowed.

Precautionary Statement(s)
Wear protective gloves. Wash hand thoroughly after handling. Do not eat, drink or smoke when using this product. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. IF SWALLOWED: Call a POISON CENTRE or doctor if you feel unwell. Rinse mouth. Dispose of contents/container in accordance with local regulations.

4: First Aid Measures

**General**

For advice, contact a Poisons Information Centre (Australia 13 11 26) or a doctor.

**Ingestion**

If swallowed, DO NOT induce vomiting. If person is conscious, rinse mouth thoroughly with water, first then give a glass of water to drink. If vomiting occurs, wash out mouth again with water and give another glass of water to drink. Seek medical attention urgently.

**Eyes**

If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre (Australia 13 11 26) or by a doctor, or for at least 15 minutes.

**Skin**

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

**Inhalation**

If swallowed or inhaled, remove from contaminated area. Apply artificial respiration if not breathing. Do not give direct mouth-to-mouth resuscitation. To protect rescuer, use air-viva, oxy-viva or one-way mask. Resuscitate in a well-ventilated area.

**Symptoms Caused by Exposure**

Please refer to Section 11- Toxicological Information.

**Medical Attention and Special Treatment**

Long term exposure to oxalic acid solutions, by ingestion, skin absorption and inhalation is linked to stone formation (insoluble crystals of calcium oxalate salt or calculi) in the kidney and urinary tract. Painful abdominal spasms during the passing of the stone and painful and difficult urination may occur. Secondary products cause damage to kidneys.

5: Fire Fighting Measures

**Suitable Extinguishing Equipment**

Extinguish fire using agent suitable for type of surrounding fire (material itself is not combustible). Use foam, dry chemical or carbon dioxide. May be washed to drain with large quantities of water.

**Specific Hazards Arising from the Chemical**

When heated to decomposition it emits carbon monoxide and formic acid.

**Special Protective Equipment and Precautions for Fire Fighters**

The following protective equipment for fire fighters is recommended when this material is present in the area of a fire. Liquid-tight chemical protective suit with breathing apparatus.

**Hazchem Code**

Not applicable

6: Accidental Release Measures

**Personal Precautions**

Keep unnecessary personnel away. Wear PPE as detailed in section 8.

**Environmental Precautions**

Seek disposal options by a licensed waste contractor

**Spills and Disposal**

**Small Spills**

Mop or wipe up with a rag or paper towel and dispose of in rubbish. Wash down surface with water.

**Large Spills**

Contain spill with absorbent material such as soil, sand, attapulgite, vermiculite. Collect and seal in properly labeled drums. Wash area with water. Seek disposal options by a licensed waste contractor.
7: Handling and Storage

Precautions for Safe Handling
Wash hands after use. Avoid direct contact with product. Use PPE as described in section 8. ALWAYS add product to water while stirring to prevent release of heat.

Conditions for Safe Storage
Always replace lid on container after use. Store out of direct sunlight and out of the reach of children.

8: Exposure Controls – Personal Protection

National Exposure Standards
TWA of 1mg/m³ as Oxalic acid, STEL of 2mg/m³ as Oxalic acid.

Engineering Controls
Avoid generation and inhalation of mists and aerosols

Individual Protection

Eyes/Face
Safety glasses

Hands
Rubber gloves

Skin
Long sleeved shirt

Respiratory
Not generally required when used as per label directions.

9: Physical and Chemical Properties

Appearance
Yellow gel

Odour
Nil

pH
0.5 – 1.5

Vapour Pressure
Not applicable

Vapour Density
Not applicable

Flash Point
Not applicable

Flammability Limits
Not flammable

Boiling Point
>100°C

Melting Point
<0°C

Specific Gravity
No data available

Solubility
Soluble in water

10: Stability and Reactivity

Chemical Stability
The product is stable under normal conditions

Possibility of Hazardous Reaction
No hazardous reactions expected when handled in accordance with label directions.

Conditions to Avoid
Avoid extreme heat and high temperatures

Incompatible Materials
Reacts with strong alkali, strong oxidizing materials, chlorites, and hypochlorites.

Hazardous Decomposition Products
Carbon monoxide and formic acid are decomposition products when involved in a fire.
11: Toxicological Information

Ingestion  
LD_{50} rat oral 3750 mg/kg (product). Harmful if swallowed. May cause irritation of mucous membranes in the mouth, pharynx, oesophagus and gastrointestinal tract. After absorption may cause agitation, spasm, nausea, vomiting.

Eye  
Severe eye irritant. May cause redness, pain and damage to the cornea. If damage is restricted to the outer layer of the eye, recovery may occur within a few days. Prolonged contact with oxalic acid solutions can produce irreversible eye damage.

Skin  
Harmful in contact with skin. Irritant and caustic effects, tissue damage. Danger of skin absorption from oxalic acid. Solutions of 5-10% oxalic acid are irritating to the skin after prolonged exposure and can cause corrosive injury.

Inhalation  
Irritation of mucous membranes, coughing and dyspnoea.

12: Ecological Information

Ecotoxicity  
LD (Xenopus laevis) Clawed toad. LC_{50} 96hr > 10g/L (product)

Persistence/Degradability  
The substance is expected to be readily biodegradable according to the AS 4351 Part 2 test protocol.

Bio-accumulative Potential  
Not expected to bio-accumulate.

Mobility in Soil  
No data available

13: Disposal Considerations

Disposal Methods  
Disposal of this product and solutions of the product should at all times comply with requirements of environmental protection and waste disposal legislation as well as requirements by local authorities. Dispose of via licensed waste disposal carriers.

14: Transport Information

UN Number  
Not applicable

Shipping Name  
Not applicable

Class  
Not applicable

Subsidiary Risk  
Not applicable

Packing Group  
Not applicable

Special Precautions For Users  
Ensure all containers are clearly labelled. Keep containers securely sealed and protected against physical damage

Hazchem Code  
Not applicable

IERG Number  
Not applicable
15: Regulatory Information

Packaging & Labelling
This product is a Scheduled Poison (S6) and must therefore be stored, maintained and used in accordance with the relevant State Poisons Act. Defined as a "Non-Dangerous Good" by the Australian Code for the Transport of Dangerous Goods by Road and Rail.

16: Other Information
